Summary

AI Automation Developer with 3+ months of hands-on production experience delivering 15+ client projects spanning agentic AI, LLM-powered SaaS platforms, RAG pipelines, backend systems, and business automation workflows. Proficient in Python, FastAPI, LangChain, LangGraph, OpenAI, Anthropic Claude, PostgreSQL, Docker, n8n, and Redis. Built and deployed production solutions on Hetzner VPS and Google Cloud Run, integrating CRMs, Airtable, webhooks, and multi-channel platforms while reducing manual effort by up to 85%. Fast learner with a strong engineering mindset, passionate about solving complex problems and rapidly mastering new technologies.

Technical Skills

Languages & Databases: Python, C++, TypeScript, SQL, PostgreSQL, MongoDB
GenAI & LLMs: LangChain, LangGraph, RAG, OpenAI API, Anthropic Claude API, Gemini API, Groq API, Hugging Face, FAISS, pgvector, ChromaDB, Sentence-Transformers, RAGAS
Frameworks & Backend: FastAPI, Flask, Django 5.1, DRF, Celery, Redis, JWT, REST APIs
Scraping & Automation: Playwright, Crawl4AI, BeautifulSoup, Telethon, Baileys, n8n, Webhooks, Airtable
Deployment & DevOps: Docker, PM2, Hetzner VPS, Google Cloud Run, GitHub Actions, Nginx, CI/CD

Experience

Relu Consultancy Remote
AI Automation Developer (Intern) *May 2025 – Present*

- Spearheaded the development of 6+ production-grade AI automation systems and full-stack SaaS platforms (including InsightFlow AI and AI Social Automate), driving significant operational efficiency for international clients.
- Architected and deployed scalable backend APIs, RAG chatbot engines, and multi-channel orchestration pipelines utilizing Python frameworks (FastAPI, Django, Flask) and LLMs (Claude, GPT-4o, Gemini) to process over 1,000 queries weekly.
- Engineered automated workflows for lead enrichment, social media scraping, and inventory management using n8n, Crawl4AI, and Celery, reducing manual processing time by up to 85%.
- Managed end-to-end deployment of 5+ applications on Hetzner VPS and Google Cloud Run using Docker, ensuring 99.9% uptime and reliable integrations with 4+ external APIs (Stripe, WhatsApp) and databases (PostgreSQL, MongoDB).

Projects

InsightFlow AI (US Insurance SaaS) | *FastAPI, Next.JS, PostgreSQL, pgvector, Claude API*

- Developed a full-stack platform delivering 5 AI modules (RAG chatbot, Policy Summarizer, Sales Assistant) for a US agency.
- Benchmarked retrieval quality with RAGAS, achieving a 92% accuracy score, and implemented semantic search using pgvector to reduce query latency by 40%.

AI Social Automate (Social Media Platform) | *Django 5.1, PostgreSQL, MongoDB, Celery, Redis*

- Designed backend with 21 SQL tables, 7 NoSQL collections, Firebase JWT auth, and task queues.
- Integrated Stripe/Razorpay webhooks with 100% idempotency and implemented lead-scraping connectors for 5 major social platforms, acquiring 500+ daily leads.

Lead Enrichment Pipeline | *Flask, Gemini 2.5 Flash, Crawl4AI, SerpAPI*

- Engineered a nightly cron-triggered API that auto-enriches 100+ client leads from SOW documents and web scrapes.
- Summarized all data into structured JSON with Gemini, **reducing manual research time by ∼85%**.

Inventory & Email Automation Systems | *n8n, GPT-4o-mini, WhatsApp, Telegram, ClickUp*

- Architected a multi-channel watch offer system integrating messaging webhooks with intent extraction via GPT-4o-mini, successfully processing 200+ offers weekly.
- Configured 10+ workflows to classify freight inquiries, deduplicating leads by 30% and logging 100% of outcomes with AI-generated audit reasons.

AviationOps Dashboard | *Airtable, Fillout*

- Redesigned schema for a US FBO to display 50+ live service orders daily, connecting check-in forms to auto-populate production records and saving 15 hours of manual entry per week.

Education

Institute of Engineering and Management Kolkata, India
B.Tech, Information Technology *Aug 2023 – Present*

Certifications

- **Google**: Generative AI Fundamentals (Google Cloud Skills Boost)
- **DeepLearning.AI**: LangChain for LLM Application Development (Coursera)
